

Create a new fork

A fork is a copy of a repository. Forking a repository allows you to freely experiment with changes without affecting the original project.

Required fields are marked with an asterisk (*).

Owner *

takahiro-sub

Repository name *

split-ergo40pct-alpha

split-ergo40pct-alpha is available.

By default, forks are named the same as their upstream repository. You can customize the name to distinguish it further.

Description (optional)

Split Low profile keyboard. auto-kdk

☒ Copy the main branch only

Contribute back to nuovotaka/split-ergo40pct-alpha by adding your own branch. [Learn more.](#)

You are creating a fork in your personal account.
